

Level: natas4 → natas5

- **Objective:**
Bypass redirect that checks for the HTTP Referer header.
- **Vulnerability/Concept Exploited:**
Manipulating HTTP headers.
- **Tools/Techniques Used:**
Browser extensions (e.g., Modify Header, tamper data), curl, Burp Suite.
- **Steps Taken:**
 1. Page redirected users without the correct Referer.
 2. Sent a request with the Referer set to the previous level's URL.
 3. Accessed the password page successfully.
