

Level: leviathan1 → leviathan2

- **Objective:**
Find the password for the next level.
- **Vulnerability/Concept Exploited:**
Binary file printing hidden password when correct input is given.
- **Tools/Commands Used:**
strings, ./binaryname
- **Steps Taken:**
 1. Located an executable binary in the home directory.
 2. Ran strings on the binary to search for hints.
 3. Found a string indicating the required password or secret.
 4. Executed the binary and provided the correct input.
 5. Got the password for leviathan2.
