

Level: leviathan5 → leviathan6

- **Objective:**
Find the password for the next level.
- **Vulnerability/Concept Exploited:**
Exploiting predictable behavior in symlinked files.
- **Tools/Commands Used:**
ln -s, ls, cat
- **Steps Taken:**
 1. Discovered that a binary interacts with a temporary file.
 2. Replaced the expected file with a symlink to /etc/leviathan_pass/leviathan6.
 3. Executed the binary, forcing it to read and output the password.
