

Level: leviathan6 → leviathan7

- **Objective:**
Find the password for the next level.
- **Vulnerability/Concept Exploited:**
Exploiting SUID binaries to escalate privileges.
- **Tools/Commands Used:**
gdb, debugging, environment manipulation
- **Steps Taken:**
 1. Analyzed a SUID binary with gdb to understand its behavior.
 2. Exploited environment variables or buffer overflows (depending on implementation).
 3. Gained control and read the password file to get the password for the next level.
